

Figure I-16. Comparison plot of the mean total annual individual dose at the RMEI location for the higher-temperature operating mode for the Proposed Action, Module 1, and incremental Module 2 inventories, nominal scenario.

Figure I-17. Total annual individual dose at the RMEI location for 500 out of 5,000 probabilistic simulations of the higher-temperature operating mode for the Proposed Action inventory under the igneous activity scenario; the figure also displays the 5th-percentile, median, mean, and 95th-percentile values of all 5,000 simulations.
